Mr. Cameron
Clark Associates Inc. company
Lancaster Pa

DEAR Cameron,

Hello, my name is Alebachew Melaku. I am a computer software engineering student at Thaddeus Stevens College of Technology. We met on February 13th at the Career Fair at the college, and I spoke with you and your associates there. I am applying today because I am interested in the software engineering internship position with your company over the summer of 2020 or earlier, if possible. My interest in software engineering, is designing different software applications, designing websites using programming languages, maintaining code, identifying and solving problems. My interest in constantly learning new things has brought me here, and I see this internship as an opportunity to build upon my current knowledge and learn new skills along the way.

My training and experience with software engineering makes me a great match for the software engineering summer internship with Clark Associates company. During my first semester, I learned about html5- hypertext markup language, git commands, CSS (Cascading style sheet), GitHub-server, and JavaScript Language. In html5, I learned how to write any text using their symmetric and syntax rule of html5 tags or elements. Also, I learned how to style the html5 content using CSS. I learned how to use git commands to create folders, files, and repositories, and to access any documents in the computer quickly on the terminal.

Currently, I am learning database-sql (structured query language), python, and Security and Professional Ethics, until May sixth 2020. In the database class, I learned how to create tables with the appropriate data types, and how to insert values. Moreover, using sql key words, I can read, update, and delete tables, columns, and values. In python class, I learned about functions, loops, class (object-oriented program), flask frame-work, and more.

Enclosed, you will find a copy of my resume. Letter of recommendation can be provided upon request. I look forward to having the chance to talk with you, and to arrange an interview in the near future. I can be reached by phone-number (857-302-9778) or email(alebachewtegegne2017@yahoo.com). Thank you for your time and consideration.

Sincerely,

Alebachew Melaku
